## Simple fitting supportive sitting with built in pressure care\*

Hours sitting in a poorly fitted chair is hard work! The Avanti can easily be adjusted to provide the necessary postural support to maximise comfort and relaxation.

Correct leg length, arm height, seat dimensions, back and seat angles provides stability, reduces point pressures and counters slumping over the chair arm and sliding off the seat.

### \*Lowzone™ Contour cushion as standard

Our contoured Lowzone™ visco-elastic cushions are regarded as providing "Medium High" pressure relief.

In our own trials using our FSA pressure monitors, these regularly exceed non contoured gel, water and standard visco-elastic cushions in pressure reduction. They are inherently more stable than fluid based systems.
