POSTURAL CARE

Symmetrikit is a division of The Helping Hand Company, Ledbury Limited

ALLDAY SLING

For comfort and active temperature management

We have designed our latest Allday fabric to offer a safe, effective "sit in" sling. The knit has been engineered for pressure relief (it has more stretch than most cushion covers) while being strong enough to be safe with minimal gusseting.

Now loaded with Omnitherm®, these slings work to maintain a more normal temperature, absorbing heat when you get hotter and releasing it back when you cool down again.

Omnitherm microcapsules within the threads of the fabric

Omnitherm® Thermal Comfort

NEW Progressive knit - this new knitting technique produces a fabric which encourages moisture to move through the fabric and away from the body. All helped by a hygroscopic 20% bamboo mix.

Fed up with specials?

Upgrade to Poser and say goodbye to the hassle and cost of ordering and managing special sling stock.

Most specials result from fixed point spreaders not accommodating changes in shape as you move between sitting and lying. This 'Intelligent' spreader bar has variable geometry as standard and self-adjusts to maintain maximum support. It eliminates the 'bunching' of fabric behind the knees and the 'crunching' where the bottom starts to be squeezed through the sling aperture. Poser gets you right to the back of the chair and positions the pelvis in an upright position without all that pushing and shoving.

Poser™ Spreader bar

It's harder to get it wrong.
4 clips to fit and you are away -
no need to choose different loops
for different lifts.

Poser can be retro-fitted to most quality hoists -
please ask for details.

Clips, Loops or Travla?

All Poser slings are available as Clip or Loop slings.
If you need to use your own sling with both Clip
and Loop spreader bars, we offer the 'Travla™'
Clip and Loop option. Pockets can be added to the
Loop or Travla™ to keep things tidy.

The **Poser Spreader bar** gets Will right to
the back of the chair.

Poser™ GP Sling

Our special cut and fabric orientation ensures
that the sling stretches in the right direction in the
right places meaning maximum comfort for every
body shape. Special attention is given to minimise
seams and edges and to give extra support to the
lower back. Available in Clip, Loop or Travla™.

Poser™ Anti Spasm

This popular sling holds the client with hips
and knees flexed, the chin tucked in and the arms
centred to help avoid triggering of extensor spasm.
Available in Clip or Loop.

Poser™ HydroGym

A multi-purpose sling for pool,
walking and sitting balance.
See pages 6 & 7 for more details.
Available in Loop.

Poser™ Pool Sling

It's bad enough fitting a sling in water
without your sling drifting off! Our Pool slings
have buoyant attachment tags for easy fitting.
Available in Clip, Loop or Travla™.

Poser™ Bathing Sling

Made from a pre softened, easy dry polyester
mesh, with the same tailored design principles
as the Ezslyde and Allday slings.
Available in Clip, Loop or Travla™.

Poser™ Hygiene HS

Head supporting one piece design with neck
roll and waist band.
Available in Clip, Loop or Travla™.

Poser™ Hygiene

Simple hygiene sling with waist belt.
Available in Clip, Loop or Travla™.

Poser®

Our Fabrics

Ezeslyde™

No need to pay for "parachute silk"; this is an
easier fitting sling with a subtle difference.
We have knitted our Ezeslyde to be silkier on
the inside than the outside. This means that
you can slip it under the user easily but the
outside offers just enough grip to stop it
acting like a slide sheet. Silky legs and
leading edges make things easier still.

Coolover™

Used in our Allday slings, Coolover has
similar temperature regulating properties to
our Symmetrisleep system fabrics, cooling
you when you get too hot and warming you
when your skin temperature drops too far.
As the foams used in many wheelchair
seating and harnessing systems are highly
insulating this is the recommended fabric for
users of special seating. Embedded
Camomile scent and bactericide treatment
keep Coolover slings smelling fresher.

Mesh

Used in our bathing and pool slings as well
as the Hydro-Gym sling. This is a pre-
softened mesh which allows free draining
and air movement when used in standing.

Wet or Dry **HydroGym™ Slings**

Standing-Walking- Swimming-Sitting

Our HydroGym sling is great in the pool - Users feel more secure and because this comfortable free draining sling stays in place, it is easier to get the swimmer in and out. Users have found that the ratio of carers to swimmers can be reduced allowing more hydro time. Handy straps allow carers to guide the user through the water.

HydroGym for walking and fall prevention - HydroGym is easy to fit and kinder on the chest. Breathable mesh construction.

HydroGym for sitting - Balance training on a physio ball .

HydroGym for transfers

You can use it for transfer into a walker- leave it in place so you can use it to get out again.

Printed on recycled paper

SYMMETRIKIT SERVICE

Peace of mind for sling owners.

Lifting Operations and Lifting Equipment Regulations (LOLER) state that duties are placed on people and companies who own, operate or have control over lifting equipment.

This includes all businesses and organisations whose employees use lifting equipment, whether owned by them or not.

LOLER also requires that all equipment used for lifting is fit for purpose, appropriate for the task, suitably marked and, in many cases, subject to statutory periodic thorough examination. BS10535 (2006) may also apply.

Records must be kept of all thorough examinations and any defects found must be reported.

Many companies can test your hoists, however slings have often been neglected or taken away for testing.

Our mobile sling testing service comes to you twice a year so you don't have to do without your slings and you will always be fully compliant.

Slings that pass are tagged and logged on our secure online database which you can easily access should an inspection occur.

Avoid nasty surprises with our Sling Maintenance Contracts

Available with our testing service. We can insure your slings so that should one fail or should your needs change, you can replace individual slings for big savings. Contract holders can manage their sling costs so there are no nasty shocks and get the most out of every sling.
